EXPERIENCE

CITY OF NORFOLK — MANAGEMENT ANALYST I - GIS

OCTOBER 2022 - PRESENT

- Implemented Python workflows to automate spatial analysis on parcel and housing data to provide insights into housing density issues.
- Developed and implemented web-based interactive GIS applications, and trained city staff to incorporate the tools into their workflows.
- Created the 2050 Future Land Use Map layers for the city's comprehensive plan update, aligning with current planning staff insights and community-driven needs.
- Maintained and updated permit and zoning databases by modifying GIS layers in response to city council actions, ensuring data accuracy and relevance.
- Created detailed land use maps for city presentations, enabling the city planning commission to make well-informed decisions regarding urban development.
- Developed Microsoft Access database applications to enhance record-keeping workflows and streamline Planner report generation.
- Supported department wide teams in the retrieval of GIS based data and general data needs.
- Compiled bi-monthly Pending Land Use reports to inform city council on upcoming planning items.

CITY OF NORFOLK — ENGINEER TECHNICIAN

NOVEMBER 2021 - OCTOBER 2022

- Digitized city water and sewer data into the GIS database based on as-built drawings.
- Collected field GPS features to enhance the completeness of utility asset infrastructure records.
- Assisted residents with processing water and sewer connection payments, ensuring accurate billing and timely service initiation.
- Exported resident requested water and sewer infrastructure maps for planning and reference.

SKILLS

GIS Tools: ArcGIS PRO, ArcMap, ArcCatalog, ArcGIS Online, Experience Builder, Survey123/survey123 connect, Instant App.

50 ESRI training courses completed.

Microsoft Suite: Excel, Access, Word, Powerpoint, Teams.

Programming:

- Python - Basic Knowledge
- HTML&CSS - Basic Knowledge

AWARDS

AIR FORCE COMMENDATION MEDAL

Received for pioneering a forensic exploitation program, leading a 16 member team, and creating 750 actionable imagery products.

AIR FORCE ACHIEVEMENT MEDAL

Awarded for solidifying the processes and procedures within the Post Ingest Exploitation team, while also opening the door to three national level agencies as

customers.

UNITED STATES AIR FORCE — *IMAGERY MANAGER*

JANUARY 2019 - NOVEMBER 2021

- Planned, organized, and managed operations, including workflow management, customer coordination, and timely production of intelligence products.
- Trained and mentored 16 junior geospatial imagery analysts, enhancing team capabilities and operational efficiency.
- Assisted personnel in correct production techniques to achieve required quality and prepared detailed technical reports and presentations for senior leadership.

UNITED STATES AIR FORCE — *IMAGERY ANALYST*

NOVEMBER 2016 - JANUARY 2019

- Oversaw updates to collection management databases and delivered verbal, graphical, and written presentations of project highlights and results.
- Created and disseminated standard and non-standard maps and map products, including detailed log sheets and reports for decision-making purposes.
- Performed baseline geospatial and imagery exploitation, applying mensuration, annotation, and feature identification techniques to produce accurate intelligence products.

EDUCATION

Arizona State University — *Bachelor of Science: Geospatial Information Sciences*

2022 - 2024

Graduated as Magna Cum Laude.

Penn State University — *Masters Certificate in GIS Web Development*

TBD

Currently enrolled in the program and have finished two GIS centered Python courses.

GEOG 485 - GIS Programming and Software Development

GEOG 489 - Advanced Python Programming for GIS
